

Maharashtra State Veterinary Council

Statutory Body Constituted by Govt. of Maharashtra Under Indian Veterinary Council Act 1994, of Govt. of India.
East High Court, Road Near Geyog Bhavan, Civil Lines Nagpur-442001. Phone : 2550895, Fax : 2550885

No. MSVC/Tech./Reg./ 406 /2017, Nagpur, Date:- 01/06/17

To,
The Commissioner of Animal Husbandry,
Govt. of Maharashtra, Commissionerate,
Opposite Spicer College, Aundh,
Pune-7.

Subject:-Resolution No.15(4) passed in the meeting of Maharashtra State Veterinary Council, Nagpur held on Dated 22 March 2017.

It is to bring to your kind notice that following problems are creating Production problems in the field. 40% Dairy Animals, i.e. Cows and Buffaloes are infertile. 15% of the Animals are not conceived even once intercalving period is very long upto 2 to 3 years. Conception is upto 30% in Artificial insemination. Repeat breeding is a big problems, if these problems are solved milk production can be increased as every calving will be possible. Milk production can be increased upto 25%.

Veterinary institutions under MAFSU conducted trials and found Extra Energy plus and bolus Conceive very useful to solve the above problems. (Research Papers enclosed)

Taking into consideration the above facts Maharashtra State Veterinary Council in its meeting held on Dtd. 22 March 2017 passed the Resolution to include the Product extra energy plus and Bolus conceive to use in the field. So as to solve the problems mentioned above. These products are manufactured by Ashoka Veterinary Pharma Ltd., Nagpur.

Council Strongly recommends that these essential supplementary in order to make infertile cows and buffaloes, Fertile and Productive. These supplementary are almost essential to resolve this burning problems, being faced by farmer

Hence, Council strongly recommends that these measures may please be undertaken at the earliest.

Registrar,

TO WHOMSOEVER IT MAY CONCERN

This is to convey you that in early lactation, cows lose appetite and do not consume sufficient feed required for high milk production. This results in reduction of weight as the cow use the body reserves of fat. The solution lies in maximising the energy intake by increasing the energy density of the diet. This is best achieved by incorporating bypass fat (Hydrogenated triglyceride with more than 80% of palmitic and stearic acid) to enhance rumen function live yeast culture, calcium salt of long chain fatty acids in the form of calcium propionate is expected to enhance milk fat percentage and blood glucose. and chromium is supposed to improve the conception rate.

Therefore, it is recommended that feed supplementation with aforementioned ingredients is likely to fulfill the nutritional gap and expected to improve milk production with its fat percentage as well.

Dairy industry provides a suitable alternative to agriculture with better profits provided their breeding cycle is regular. But, this is offset by infertility / repeat breeders in our country. This is partly because of deficiency of essential minerals eg. Manganese, Cobalt, Zinc, Selenium, Chromium, Copper. It is well accepted fact if minerals are chelated with amino acids their absorption is enhanced. Therefore, I am of the opinion that supplementation of multiminerals with chelated amino acids may be advantageous for follicular development, ovulation, embryo survival, maintaining pregnancy and increasing calving rate.

Subject: A Note of Thanks and Request for Continuous Cooperation..

Sir,

With reference to the subject cited above, a special National Service Scheme Camp-2016 in respect of animal health and surgical work camp was successfully organized by Nagpur Veterinary College, Nagpur at Kalamb block of Yavatmal district during 4th to 10th November 2016. As a matter of fact the expert health care services were provided by the team of experts from this college for the benefit of the farmers in general and livestock keepers in particular.

On behalf of the Staff and Students of Nagpur Veterinary College, Nagpur I wish to express our deep gratitude for cooperation and support rendered by your esteem organization. This is a definite indication of goodwill and good faith on your part and we are deeply interested to reciprocate this magnanimous act.

Finally I wish to thank you for your generosity and goodwill and earnestly request you to develop this relationship further.

With Regards,

Dean

To whom so ever it may concern

This is to certify that I have administered medicinal product named Extra Energy Plus powder in the cases presented for hypogalactia and conceive bolus in the cases of infertility in caws and buffaloes. After judicious use of aforementioned products I am of the opinion that these medicines have a significantly positive effect on the production and reproduction.

To whom this may concern.

This is to certify that I have used product name Conceive ^{bovine} in the cases of infertility in cows and buffaloes. After judicious use of above mentioned products, I am of the opinion that these medicines have a significantly positive effect on the production and stem production. Milk production can be increased upto 3lit.

Bovine Conceive is very useful for the treatment of infertility. Cow's exhibit heat within one month and conception rate also noticed above 60%

Bovine Conceive and extra energy plus is very effective for infertility to bring in to heat and for A.I. Conception rate is very good.

DIST Yavatmal (MAHARASHTRA)

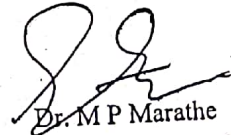

Certified that we had used in workcamps and veterinary practices the products Bolus Conceivae and Powder Extra energy plus manufactured by Ashoka veterinary pharma ltd, Nagpur found to be very effective in the treatment of infertility.

Powder Extra energy plus is effective to increase milk production and to regularize the reproductive health of genital tract of dairy cattle.

Bolus conceivae helps to bring animal in heat within a month and conception rate significantly improved (i.e. above 70%).

Both the products are very useful to control the infertility and that helps to improve artificial insemination work.
